

## Aim

To create an account on Netlify and upload (deploy) a web project.

### Steps to Create a Netlify Account and Upload a Project

#### Step 1: Open Netlify Website

1. Open any web browser.
2. Go to <https://www.netlify.com>.

#### Step 2: Sign Up on Netlify

1. Click on the **Sign Up** button.
2. Choose a sign-up method:
  - o Sign up with **GitHub**
  - o or **Email**
3. Enter the required details and complete the sign-up process.
4. After successful login, the Netlify dashboard will open.

#### Step 3: Prepare the Project

1. Create a folder containing:
    - o index.html
    - o CSS and JavaScript files (if any)
  2. Make sure index.html is present (mandatory).
- 

#### Step 4: Upload the Project

1. On the Netlify dashboard, click **Add new site**.
2. Select **Deploy manually**.
3. Drag and drop the project folder into the upload area.

#### Step 5: Deployment

1. Netlify automatically uploads and deploys the project.
2. A live URL is generated.
3. Open the URL to view the hosted website.

#### Step 6: Verify Deployment

1. Check if the website loads correctly.
2. Confirm that all pages and links are working.

## **Result**

**The Netlify account was successfully created and the project was uploaded and deployed online.**
